Journal of Inorganic Biochemistry 79 (2000) 391–396

JOURNAL OF Inorganic Biochemistry

Subject Index of Volume 79

Absorption spectroscopy
anion- and pH-linked conformational transition in horseradish peroxidase, 25
Acetonylphosphonate
metal ion–carbonyl oxygen recognition in complexes of acetyl phosphate, 247
Acetyl phosphate
metal ion–carbonyl oxygen recognition in complexes of acetyl phosphate, 247
Alanine
gas-phase metal ion (Li^+, Na^+, Cu^+) affinities of glycine and alanine, 179
Alginic acid
nanoscale iron(III) oxyhydroxy aggregates formed in the presence of functional water-soluble polymers: models for iron(III) biomineralisation processes, 109
Alkaline phosphatase
ancient metalloenzymes as possible markers in molecular archaeology, 3
Alzheimer's disease
metal-thiolate clusters in neuronal growth inhibitory factor (GIF), 7
AMP–Fe^{3+}
the role of free radical reactions with haemoglobin and thalassaemia, 327
Ancient metalloenzymes
ancient metalloenzymes as possible markers in molecular archaeology, 3
Anti-inflammatory activity
transition metal complexes of diclofenac with potentially interesting anti-inflammatory activity, 153
Antimetastatic activity
antimetastatic properties and DNA interactions of the novel class of dimeric Ru(III) compounds $Na_2[\{trans\text{-}RuCl_4(Me_2SO)\}_2(\mu\text{-}L)]$ (L = ditopic, non-chelating aromatic N-ligand). A preliminary investigation, 173
Antimicrobial activity
controlling gene expression by zinc(II)–macrocyclic tetraamine complexes, 253
Antitumor activity
synthesis, characterization and in vitro antitumor activity of di- and triorganotin derivatives of polyoxa- and biologically relevant carboxylic acids, 139
Arsenate
arsenite, arsenate and vanadate affect human erythrocyte membrane, 195
Arsenite
arsenite, arsenate and vanadate affect human erythrocyte membrane, 195
ATP–Fe^{3+}
the role of free radical reactions with haemoglobin and thalassaemia, 327
Binding to TATA box
controlling gene expression by zinc(II)–macrocyclic tetraamine complexes, 253
Bioconversions
direct micellar systems as a tool to improve the efficiency of aromatic substrate conversion for fine chemicals production, 103
Biodistribution
structural and in vivo studies of metal chelates of Ga(III) relevant to biomedical imaging, 359
Bioinorganic model chemistry
heavy metal mutagenicity: insights from bioinorganic model chemistry, 261
Biomimetic materials
design and synthesis of new biomimetic materials, 93
Biophysical techniques
does the haemosiderin iron core determine its potential for chelation and the development of iron-induced tissue damage?, 311
Bioremediation
engineering outer-membrane proteins in *Pseudomonas putida* for enhanced heavy-metal bioadsorption, 219
Biosensors
bacterial metal-resistance proteins and their use in biosensors for the detection of bioavailable heavy metals, 225
Bivalent metal ions
on the mechanism of action of thiamin enzymes in the presence of bivalent metal ions, 21
Blood compatibility
micropattern immobilization of polysaccharide, 77
Cadmium
inhibition of antimutagenic enzymes, 8-oxo-dGTPases, by carcinogenic metals. Recent developments, 231
cadmium carcinogenesis in review, 241
Capacitance
bacterial metal-resistance proteins and their use in biosensors for the detection of bioavailable heavy metals, 225
Carbonyl oxygen–metal ion binding
metal ion–carbonyl oxygen recognition in complexes of acetyl phosphate, 247
Carboxylic acids
synthesis, characterization and in vitro antitumor activity of di- and triorganotin derivatives of polyoxa- and biologically relevant carboxylic acids, 139
Carcinogenesis
cadmium carcinogenesis in review, 241
Causal links
chemical speciation applied to bio-inorganic chemistry, 275
^{113}Cd NMR spectroscopy
metal-thiolate clusters in neuronal growth inhibitory factor (GIF), 7
Cell growth
micropattern immobilization of polysaccharide, 77

Cell mobilisation
immobilisation of sulphated hyaluronan for improved biocompatibility, 119
Chelation
does the haemosiderin iron core determine its potential for chelation and the development of iron-induced tissue damage?, 311
Chemical speciation
chemical speciation applied to bio-inorganic chemistry, 275
Chloride
rates of platination of -**AG**- and -**GA**- containing double-stranded oligonucleotides: effect of chloride concentration, 167
Chloride effects
anion- and pH-linked conformational transition in horseradish peroxidase, 25
Circular dichroism
circular dichroism, kinetic and mass spectrometric studies of copper(I) and mercury(II) binding to metallothionein, 11
Circular dichroism spectroscopy
metal-thiolate clusters in neuronal growth inhibitory factor (GIF), 7
Cisplatin
rates of platination of -**AG**- and -**GA**- containing double-stranded oligonucleotides: effect of chloride concentration, 167
Cobalt
inhibition of antimutagenic enzymes, 8-oxo-dGTPases, by carcinogenic metals. Recent developments, 231
Cobalt ions
NMR studies of metal ion binding to the Zn-finger-like HNH motif of colicin E9, 365
Colicin
NMR studies of metal ion binding to the Zn-finger-like HNH motif of colicin E9, 365
Common cold
chemical speciation applied to bio-inorganic chemistry, 275
Composite hip
polymer-based composite hip prostheses, 97
Computer simulation
chemical speciation applied to bio-inorganic chemistry, 275
Conformational analysis
enzyme-mimetic model compounds: conformational analysis and far-IR study of $Cu(TAAB)^{2+}$, 53
Copper
design of copper-based anti-inflammatory drugs, 147
inhibition of antimutagenic enzymes, 8-oxo-dGTPases, by carcinogenic metals. Recent developments, 231
Copper accumulation
copper transport and its defect in Wilson disease: characterization of the copper-binding domain of Wilson disease ATPase, 187
Copper-binding protein
copper transport and its defect in Wilson disease: characterization of the copper-binding domain of Wilson disease ATPase, 187
Copper(I) binding
circular dichroism, kinetic and mass spectrometric studies of copper(I) and mercury(II) binding to metallothionein, 11
Copper(II) complexes
EPR characterization of mono(thiosemicarbazones) copper(II) complexes. Note II, 333
Copper-transport defect
copper transport and its defect in Wilson disease: characterization of the copper-binding domain of Wilson disease ATPase, 187
Copper-transporting ATPase
copper transport and its defect in Wilson disease: characterization of the copper-binding domain of Wilson disease ATPase, 187
Core histone tetramer
molecular models in nickel carcinogenesis, 213
Cross-links
NMR studies on metal complexes of DNA oligomers, 353
$Cu[TAAB]^{2+}$
enzyme-mimetic model compounds: conformational analysis and far-IR study of $Cu(TAAB)^{2+}$, 53
Cytochrome
in vivo optical/near-infrared spectroscopy and imaging of metalloproteins, 285
Cytochrome *c* nitrite reductase
bacterial cytochrome *c* nitrite reductase: new structural and functional aspects, 381
Cytotoxicity
a discussion of the chemistry of oxidative and nitrosative stress in cytotoxicity, 237

Density functional theory
gas-phase metal ion (Li^+, Na^+, Cu^+) affinities of glycine and alanine, 179
2′-Deoxyguanosine oxidation
molecular models in nickel carcinogenesis, 213
Desferrioxamine B
some factors affecting metal ion–monohydroxamate interactions in aqueous solution, 205
Diclofenac
transition metal complexes of diclofenac with potentially interesting anti-inflammatory activity, 153
(+)-*cis*-(1*R*,2*S*)-Dihydroxy-1,2-dihydronaphthalene
direct micellar systems as a tool to improve the efficiency of aromatic substrate conversion for fine chemicals production, 103
Diiron biosites
design and synthesis of new models for diiron biosites, 41
Dinuclear ruthenium(III) complexes
antimetastatic properties and DNA interactions of the novel class of dimeric Ru(III) compounds $Na_2[\{trans\text{-}RuCl_4(Me_2SO)\}_2(\mu\text{-}L)]$ (L = ditopic, non-chelating aromatic N-ligand). A preliminary investigation, 173
Direct micellar systems
direct micellar systems as a tool to improve the efficiency of aromatic substrate conversion for fine chemicals production, 103
Dithionite reactivity
new mechanistic insights into the reactivity of the R2 protein of *E. coli* ribonucleotide reductase (RNR), 59
DNA
rates of platination of -**AG**- and -**GA**- containing double-stranded oligonucleotides: effect of chloride concentration, 167
DNA binding
antimetastatic properties and DNA interactions of the novel class of dimeric Ru(III) compounds $Na_2[\{trans\text{-}RuCl_4(Me_2SO)\}_2(\mu\text{-}L)]$ (L = ditopic, non-chelating aromatic N-ligand). A preliminary investigation, 173
Docking
electron transfer properties of iron–sulfur proteins, 83

Electrode
bacterial metal-resistance proteins and their use in biosensors for the detection of bioavailable heavy metals, 225
Electronic absorption
effect of low temperature on soybean peroxidase: spectroscopic characterization of the quantum-mechanically admixed spin state, 269
Electron paramagnetic resonance
effect of low temperature on soybean peroxidase: spectroscopic characterization of the quantum-mechanically admixed spin state, 269
Electron paramagnetic resonance spectroscopy
synthetic analogs for oxovanadium(IV/V)–glutathione interaction: an NMR, EPR, synthetic and structural study of oxovanadium(IV/V) compounds with sulfhydryl-containing pseudopeptides and dipeptides, 159
EPR characterization of mono(thiosemicarbazones) copper(II) complexes. Note II, 333

bacterial cytochrome *c* nitrite reductase: new structural and functional aspects, 381
Electron spin echo envelope modulation
design and synthesis of new biomimetic materials, 93
Electron spin echo envelope modulation spectroscopy
effect of pH on the semiquinone radical Q_A^- in CN-treated photosystem II: study by hyperfine sublevel correlation spectroscopy, 339
Endonuclease
NMR studies of metal ion binding to the Zn-finger-like HNH motif of colicin E9, 365
Enthalpy changes
thermodynamic, kinetic and structural studies on the ternary palladium(II) complexes of thioether ligands, 129
Enzyme-inhibitor complex
metal complexes of salicylhydroxamic acid (H_2Sha), anthranilic hydroxamic acid and benzohydroxamic acid. Crystal and molecular structure of $[Cu(phen)_2(Cl)]Cl \cdot H_2Sha$, a model for a peroxidase-inhibitor complex, 47
Equilibrium studies
some factors affecting metal ion–monohydroxamate interactions in aqueous solution, 205
Exchange
electron transfer properties of iron–sulfur proteins, 83
Extended X-ray absorption fine structure spectroscopy
metal-thiolate clusters in neuronal growth inhibitory factor (GIF), 7

Far-infrared
enzyme-mimetic model compounds: conformational analysis and far-IR study of $Cu(TAAB)^{2+}$, 53
$Fe^{III}{}_2$ enzyme
new mechanistic insights into the reactivity of the R2 protein of *E. coli* ribonucleotide reductase (RNR), 59
Fe(III) complexes
design and synthesis of new models for diiron biosites, 41
Fenton reaction
redox reactions of neurotransmitters possibly involved in the progression of Parkinson's Disease, 319
Ferredoxin
electron transfer properties of iron–sulfur proteins, 83
Ferrihydrite
nanoscale iron(III) oxyhydroxy aggregates formed in the presence of functional water-soluble polymers: models for iron(III) biomineralisation processes, 109
infrared spectroscopic studies of nanoscale iron oxide deposits isolated from human thalassemic tissues, 303
Ferritin
infrared spectroscopic studies of nanoscale iron oxide deposits isolated from human thalassemic tissues, 303
redox reactions of neurotransmitters possibly involved in the progression of Parkinson's Disease, 319
Framework ligands
design and synthesis of new models for diiron biosites, 41
Free radicals
the role of free radical reactions with haemoglobin and thalassaemia, 327

Gallium
structural and in vivo studies of metal chelates of Ga(III) relevant to biomedical imaging, 359
Glycine
gas-phase metal ion (Li^+, Na^+, Cu^+) affinities of glycine and alanine, 179
Goethite
infrared spectroscopic studies of nanoscale iron oxide deposits isolated from human thalassemic tissues, 303

H-bonds
effect of pH on the semiquinone radical Q_A^- in CN-treated photosystem II: study by hyperfine sublevel correlation spectroscopy, 339
Healthcare agents
chemical speciation applied to bio-inorganic chemistry, 275
Heavy metal mutagenicity
heavy metal mutagenicity: insights from bioinorganic model chemistry, 261
Heavy metals
engineering outer-membrane proteins in *Pseudomonas putida* for enhanced heavy-metal bioadsorption, 219
bacterial metal-resistance proteins and their use in biosensors for the detection of bioavailable heavy metals, 225
Heme-containing peroxidases
effect of low temperature on soybean peroxidase: spectroscopic characterization of the quantum-mechanically admixed spin state, 269
Heme-peptide
covalently modified microperoxidases as heme-peptide models for peroxidases, 31
Hemoglobin
in vivo optical/near-infrared spectroscopy and imaging of metalloproteins, 285
the role of free radical reactions with haemoglobin and thalassaemia, 327
Hemoproteins
multinuclear (^{13}C, ^{17}O, ^{57}Fe) NMR studies of carbonmonoxy heme proteins and synthetic model compounds, 371
Hemosiderin
infrared spectroscopic studies of nanoscale iron oxide deposits isolated from human thalassemic tissues, 303
does the haemosiderin iron core determine its potential for chelation and the development of iron-induced tissue damage?, 311
Heparin
micropattern immobilization of polysaccharide, 77
Histone H1
molecular models in nickel carcinogenesis, 213
Histone H2A
molecular models in nickel carcinogenesis, 213
Histone H3
molecular models in nickel carcinogenesis, 213
Histone H4
molecular models in nickel carcinogenesis, 213
Horseradish peroxidase
anion- and pH-linked conformational transition in horseradish peroxidase, 25
Human erythrocyte
arsenite, arsenate and vanadate affect human erythrocyte membrane, 195
Humans
cadmium carcinogenesis in review, 241
Hydrazine reactivity
new mechanistic insights into the reactivity of the R2 protein of *E. coli* ribonucleotide reductase (RNR), 59
Hydrogels
immobilisation of sulphated hyaluronan for improved biocompatibility, 119
Hydrogen peroxide
covalently modified microperoxidases as heme-peptide models for peroxidases, 31
Hydroxamic acids
metal complexes of salicylhydroxamic acid (H_2Sha), anthranilic hydroxamic acid and benzohydroxamic acid. Crystal and molecular structure of $[Cu(phen)_2(Cl)]Cl \cdot H_2Sha$, a model for a peroxidase-inhibitor complex, 47
6-Hydroxydopamine
redox reactions of neurotransmitters possibly involved in the progression of Parkinson's Disease, 319

Hyperfine sub-level correlation spectroscopy
effect of pH on the semiquinone radical Q_A^- in CN-treated photosystem II: study by hyperfine sublevel correlation spectroscopy, 339

IgA protease
engineering outer-membrane proteins in *Pseudomonas putida* for enhanced heavy-metal bioadsorption, 219
Imaging
in vivo optical/near-infrared spectroscopy and imaging of metalloproteins, 285
Inhibition of TATA binding protein
controlling gene expression by zinc(II)–macrocyclic tetraamine complexes, 253
Inhibition of type I and II topoisomerases
controlling gene expression by zinc(II)–macrocyclic tetraamine complexes, 253
Interstrand cross-links
antimetastatic properties and DNA interactions of the novel class of dimeric Ru(III) compounds $Na_2[\{trans\text{-}RuCl_4(Me_2SO)\}_2(\mu\text{-}L)]$ (L = ditopic, non-chelating aromatic N-ligand). A preliminary investigation, 173
In vivo
in vivo optical/near-infrared spectroscopy and imaging of metalloproteins, 285
Ischemia
in vivo optical/near-infrared spectroscopy and imaging of metalloproteins, 285
Isomeric complexes
metal ion–carbonyl oxygen recognition in complexes of acetyl phosphate, 247

Kinetics
rates of platination of -**AG**- and -**GA**- containing double-stranded oligonucleotides: effect of chloride concentration, 167
Kinetic studies
thermodynamic, kinetic and structural studies on the ternary palladium(II) complexes of thioether ligands, 129

Macrophages
does the haemosiderin iron core determine its potential for chelation and the development of iron-induced tissue damage?, 311
Mass spectrometry
circular dichroism, kinetic and mass spectrometric studies of copper(I) and mercury(II) binding to metallothionein, 11
Mechanical properties
polymer-based composite hip prostheses, 97
Membrane proteins
arsenite, arsenate and vanadate affect human erythrocyte membrane, 195
Mercury(II) binding
circular dichroism, kinetic and mass spectrometric studies of copper(I) and mercury(II) binding to metallothionein, 11
MerR
bacterial metal-resistance proteins and their use in biosensors for the detection of bioavailable heavy metals, 225
Metal-binding proteins
bacterial metal-resistance proteins and their use in biosensors for the detection of bioavailable heavy metals, 225
Metal complexes
metal complexes of salicylhydroxamic acid (H_2Sha), anthranilic hydroxamic acid and benzohydroxamic acid. Crystal and molecular structure of $[Cu(phen)_2(Cl)]Cl\cdot H_2Sha$, a model for a peroxidase-inhibitor complex, 47
some factors affecting metal ion–monohydroxamate interactions in aqueous solution, 205
NMR studies on metal complexes of DNA oligomers, 353
Metal ion affinity
gas-phase metal ion (Li^+, Na^+, Cu^+) affinities of glycine and alanine, 179
Metallothionein
circular dichroism, kinetic and mass spectrometric studies of copper(I) and mercury(II) binding to metallothionein, 11
engineering outer-membrane proteins in *Pseudomonas putida* for enhanced heavy-metal bioadsorption, 219
Metal-thiolate clusters
metal-thiolate clusters in neuronal growth inhibitory factor (GIF), 7
Microperoxidases
covalently modified microperoxidases as heme-peptide models for peroxidases, 31
Mineralisation
does the haemosiderin iron core determine its potential for chelation and the development of iron-induced tissue damage?, 311
Mixed-acid anhydrides
metal ion–carbonyl oxygen recognition in complexes of acetyl phosphate, 247
Model complexes
synthesis and reactivity studies of model complexes for molybdopterin-dependent enzymes, 67
Modeling
design and synthesis of new models for diiron biosites, 41
Molecular archaeology
ancient metalloenzymes as possible markers in molecular archaeology, 3
Molecular mechanics
design of copper-based anti-inflammatory drugs, 147
Molybdenum cofactor
synthesis and reactivity studies of model complexes for molybdopterin-dependent enzymes, 67
Molybdopterin
synthesis and reactivity studies of model complexes for molybdopterin-dependent enzymes, 67
Monohydroxamic acids
some factors affecting metal ion–monohydroxamate interactions in aqueous solution, 205
Mono(thiosemicarbazone)
EPR characterization of mono(thiosemicarbazones) copper(II) complexes. Note II, 333
Multiheme protein
bacterial cytochrome c nitrite reductase: new structural and functional aspects, 381
Multinuclear magnetic resonance spectroscopy
multinuclear (^{13}C, ^{17}O, ^{57}Fe) NMR studies of carbonmonoxy heme proteins and synthetic model compounds, 371
Myoglobin
in vivo optical/near-infrared spectroscopy and imaging of metalloproteins, 285

^{14}N
effect of pH on the semiquinone radical Q_A^- in CN-treated photosystem II: study by hyperfine sublevel correlation spectroscopy, 339
Naphthalene
direct micellar systems as a tool to improve the efficiency of aromatic substrate conversion for fine chemicals production, 103
Naphthalene dioxygenase
direct micellar systems as a tool to improve the efficiency of aromatic substrate conversion for fine chemicals production, 103
Nickel
inhibition of antimutagenic enzymes, 8-oxo-dGTPases, by carcinogenic metals. Recent developments, 231
Nickel(II)
molecular models in nickel carcinogenesis, 213
Nickel(II)–peptide interactions
molecular models in nickel carcinogenesis, 213

Nickel ions
NMR studies of metal ion binding to the Zn-finger-like HNH motif of colicin E9, 365
Nitric oxide
a discussion of the chemistry of oxidative and nitrosative stress in cytotoxicity, 237
Nitrosative stress
a discussion of the chemistry of oxidative and nitrosative stress in cytotoxicity, 237
Normal-coordinate analysis
enzyme-mimetic model compounds: conformational analysis and far-IR study of $Cu(TAAB)^{2+}$, 53
Nuclear magnetic resonance
electron transfer properties of iron–sulfur proteins, 83
Nuclear magnetic resonance spectroscopy
synthetic analogs for oxovanadium(IV/V)–glutathione interaction: an NMR, EPR, synthetic and structural study of oxovanadium(IV/V) compounds with sulfhydryl-containing pseudopeptides and dipeptides, 159
rates of platination of -**AG**- and -**GA**- containing double-stranded oligonucleotides: effect of chloride concentration, 167
trends in NMR chemical shifts and ligand mobility of TcO(V) and ReO(V) complexes with aminothiols, 347
NMR studies on metal complexes of DNA oligomers, 353
NMR studies of metal ion binding to the Zn-finger-like HNH motif of colicin E9, 365

Old Kingdom
ancient metalloenzymes as possible markers in molecular archaeology, 3
Oligonucleotides
NMR studies on metal complexes of DNA oligomers, 353
Organotin derivatives
synthesis, characterization and in vitro antitumor activity of di- and triorganotin derivatives of polyoxa- and biologically relevant carboxylic acids, 139
Oxidation catalysis
design and synthesis of new biomimetic materials, 93
Oxidative stress
a discussion of the chemistry of oxidative and nitrosative stress in cytotoxicity, 237
redox reactions of neurotransmitters possibly involved in the progression of Parkinson's Disease, 319
8-Oxo-dGTPase
inhibition of antimutagenic enzymes, 8-oxo-dGTPases, by carcinogenic metals. Recent developments, 231
Oxorhenium complexes
trends in NMR chemical shifts and ligand mobility of TcO(V) and ReO(V) complexes with aminothiols, 347
Oxotechnetium complexes
trends in NMR chemical shifts and ligand mobility of TcO(V) and ReO(V) complexes with aminothiols, 347
Oxotransferase
synthesis and reactivity studies of model complexes for molybdopterin-dependent enzymes, 67
Oxovanadium(IV) compounds
synthetic analogs for oxovanadium(IV/V)–glutathione interaction: an NMR, EPR, synthetic and structural study of oxovanadium(IV/V) compounds with sulfhydryl-containing pseudopeptides and dipeptides, 159

pK_a values
metal complexes of salicylhydroxamic acid (H_2Sha), anthranilic hydroxamic acid and benzohydroxamic acid. Crystal and molecular structure of $[Cu(phen)_2(Cl)]Cl \cdot H_2Sha$, a model for a peroxidase-inhibitor complex, 47

Palladium(II) complexes
thermodynamic, kinetic and structural studies on the ternary palladium(II) complexes of thioether ligands, 129
Parkinsonism
redox reactions of neurotransmitters possibly involved in the progression of Parkinson's Disease, 319
Pattern immobilization
micropattern immobilization of polysaccharide, 77
Peptide bond hydrolysis
molecular models in nickel carcinogenesis, 213
Peroxidase models
covalently modified microperoxidases as heme-peptide models for peroxidases, 31
pH effects
anion- and pH-linked conformational transition in horseradish peroxidase, 25
Phosphate
infrared spectroscopic studies of nanoscale iron oxide deposits isolated from human thalassemic tissues, 303
Phosphonate
structural and in vivo studies of metal chelates of Ga(III) relevant to biomedical imaging, 359
Photoimmobilisation process
immobilisation of sulphated hyaluronan for improved biocompatibility, 119
Photosystem II
effect of pH on the semiquinone radical Q_A^- in CN-treated photosystem II: study by hyperfine sublevel correlation spectroscopy, 339
Polyacrylic acid
nanoscale iron(III) oxyhydroxy aggregates formed in the presence of functional water-soluble polymers: models for iron(III) biomineralisation processes, 109
Poly(ether-imide)
polymer-based composite hip prostheses, 97
Polyvinyl alcohol
nanoscale iron(III) oxyhydroxy aggregates formed in the presence of functional water-soluble polymers: models for iron(III) biomineralisation processes, 109
Porphyrins
surface-enhanced resonance Raman spectroscopy of porphyrin and metalloporphyrin species in systems with Ag nanoparticles and their assemblies, 295
Pseudomonas
engineering outer-membrane proteins in *Pseudomonas putida* for enhanced heavy-metal bioadsorption, 219

Q_A^-
effect of pH on the semiquinone radical Q_A^- in CN-treated photosystem II: study by hyperfine sublevel correlation spectroscopy, 339
Quantum-admixed spin
effect of low temperature on soybean peroxidase: spectroscopic characterization of the quantum-mechanically admixed spin state, 269

R2 protein of RNR
new mechanistic insights into the reactivity of the R2 protein of *E. coli* ribonucleotide reductase (RNR), 59
Resonance Raman
effect of low temperature on soybean peroxidase: spectroscopic characterization of the quantum-mechanically admixed spin state, 269
Resonance Raman spectroscopy
anion- and pH-linked conformational transition in horseradish peroxidase, 25
Rheumatoid arthritis
design of copper-based anti-inflammatory drugs, 147
Ribonucleotide reductase
new mechanistic insights into the reactivity of the R2 protein of *E. coli* ribonucleotide reductase (RNR), 59

RNR mechanism
new mechanistic insights into the reactivity of the R2 protein of *E. coli* ribonucleotide reductase (RNR), 59
Rodents
cadmium carcinogenesis in review, 241

Semi-empirical calculations
*enzyme-mimetic model compounds: conformational analysis and far-*IR study of $Cu(TAAB)^{2+}$, 53
Silver colloid-adsorbate films
surface-enhanced resonance Raman spectroscopy of porphyrin and metalloporphyrin species in systems with Ag nanoparticles and their assemblies, 295
Silver nanoparticles
surface-enhanced resonance Raman spectroscopy of porphyrin and metalloporphyrin species in systems with Ag nanoparticles and their assemblies, 295
Site-directed mutagenesis
electron transfer properties of iron–sulfur proteins, 83
SmtA
bacterial metal-resistance proteins and their use in biosensors for the detection of bioavailable heavy metals, 225
Sol-gel
design and synthesis of new biomimetic materials, 93
Spacers
surface-enhanced resonance Raman spectroscopy of porphyrin and metalloporphyrin species in systems with Ag nanoparticles and *their assemblies*, 295
Speciation
molecular models in nickel carcinogenesis, 213
Spectroscopy
transition metal complexes of diclofenac with potentially interesting anti-inflammatory activity, 153
Stability constants
metal complexes of salicylhydroxamic acid (H_2Sha), anthranilic hydroxamic acid and benzohydroxamic acid. Crystal and molecular structure of $[Cu(phen)_2(Cl)]Cl \cdot H_2Sha$, a model for a peroxidase-inhibitor complex, 47
thermodynamic, kinetic and structural studies on the ternary palladium(II) complexes of thioether ligands, 129
design of copper-based anti-inflammatory drugs, 147
some factors affecting metal ion–monohydroxamate interactions in aqueous solution, 205
Structure
EPR characterization of mono(thiosemicarbazones) copper(II) complexes. Note II, 333
structural and in vivo studies of metal chelates of Ga(III) relevant to biomedical imaging, 359
Sulfated hyaluronic acid
micropattern immobilization of polysaccharide, 77
Sulfhydryl-containing pseudopeptides and dipeptides
synthetic analogs for oxovanadium(IV/V)–glutathione interaction: an NMR, EPR, synthetic and structural study of oxovanadium(IV/V) compounds with sulfhydryl-containing pseudopeptides and dipeptides, 159
Sulphated hyaluronan
immobilisation of sulphated hyaluronan for improved biocompatibility, 119
Superparamagnetism
nanoscale iron(III) oxyhydroxy aggregates formed in the presence of *functional water-soluble polymers: models for iron(III) biomineralisation* processes, 109
Surface-enhanced resonance Raman scattering
surface-enhanced resonance Raman spectroscopy of porphyrin and metalloporphyrin species in systems with Ag nanoparticles and their assemblies, 295
Synthetic model compounds
multinuclear (^{13}C, ^{17}O, ^{57}Fe) NMR studies of carbonmonoxy heme proteins and synthetic model compounds, 371

Thalassaemia
the role of free radical reactions with haemoglobin and thalassaemia, 327
Thiamin enzymes
on the mechanism of action of thiamin enzymes in the presence of bivalent metal ions, 21
Thioether ligands
thermodynamic, kinetic and structural studies on the ternary palladium(II) complexes of thioether ligands, 129
Tissue biodistribution
design of copper-based anti-inflammatory drugs, 147
Tissue engineering
micropattern immobilization of polysaccharide, 77
Transition metal complexes
transition metal complexes of diclofenac with potentially interesting anti-inflammatory activity, 153
Transplatin
NMR studies on metal complexes of DNA oligomers, 353
Triazamacrocycle
structural and in vivo studies of metal chelates of Ga(III) relevant to biomedical imaging, 359
Tyrosyl radical enzyme
new mechanistic insights into the reactivity of the R2 protein of *E. coli* ribonucleotide reductase (RNR), 59

Vanadate
arsenite, arsenate and vanadate affect human erythrocyte membrane, 195

Wilson disease
copper transport and its defect in Wilson disease: characterization of the copper-binding domain of Wilson disease ATPase, 187

Zinc
cadmium carcinogenesis in review, 241
Zinc(II)-macrocyclic tetraamine complexes
controlling gene expression by zinc(II)–macrocyclic tetraamine complexes, 253
Zinc ions
NMR studies of metal ion binding to the Zn-finger-like HNH motif of colicin E9, 365
